### Easy, wireless scanning. Efficient document management.

Welcome to the next generation of efficiency for fast-paced businesses like yours — featuring the WorkForce DS-560 document scanner. Wirelessly scan critical documents to smartphones, tablets, PCs or Macs. Or, scan directly to cloud services<sup>1</sup> from your PC or Mac. This powerful scanner offers everything you need to manage business documents. Save time, and even save space. Delivering speeds up to 26 ppm<sup>2</sup>, the compact DS-560 can quickly take on any task. Use it to create searchable PDFs<sup>3</sup>, or make quick color/image adjustments. Its 50-page ADF allows you to quickly scan stacks of documents. Compatible with most professional document management systems, the reliable DS-560 supports ISIS and TWAIN drivers.

Scan wirelessly to your device

Scan to the cloud

#### Easy Epson Wireless

Now, you can wirelessly scan to your smartphone, tablet, PC or Mac, or favorite cloud service<sup>1</sup>. Scan directly to mobile devices without the need for a go-between device. Critical documents get where they need to be, faster and in fewer steps — from your scanner to your smartphone to the intended destination. It's just that easy.

#### Scan directly to the cloud<sup>1</sup>

The WorkForce DS-560 scans directly to popular cloud services. Just install the included software on your PC or Mac and you're ready to get started. Scan and send data wherever it needs to be.

## Efficient document scanning

Scan multiple sizes in a single stack

Optional Network Interface Unit available

## Versatile Paper Handling

Tackle any task with little to no downtime thanks to features such as dynamic skew correction, auto paper size detection, double-feed detection, and multi-roller paper feed. The DS-560 easily accommodates oversized folded pages, single sheets, stacks of business cards and rigid ID cards.

Scan oversized documents in one pass

## Color Enhance

Color Enhance allows users to select and enhance a color from the RGB color channels when scanning in black-and-white. This can help bring out a particular element that might not otherwise show up clearly in a black-and-white scan, such as a signature made with a light-blue pen.

## Color Dropout

Color Dropout allows users to remove a color from the RGB color channels — a color that might cause noise or other image issues during a document scan. For example, a user scanning an invoice printed on pink paper could use “Color Dropout: Red” to ignore all red elements and pull out the crisp black text.
