UltraChrome® PRO12 Ink

Widest color gamut in its class[1]

99% match of PANTONE Formula Guide solid coated colors[2]

Industry leading print permanence[3]

1.6 Liter bulk ink pack system

Ink packs use up to 90% less plastic vs cartridges[4]

Reduced cartridge changes

1. Versus comparable professional large-format (24", 44" and 64") photographic and fine art printers as of March 1, 2024. Based on total gamut volume measured on comparable media
2. 99% coverage of PANTONE® Solid Coated color palette based on Epson Proofing Paper White Semimatte printed with the Epson Driver at 2400 x 1200 dpi. PANTONE coverage may vary when printed under other conditions
3. Print permanence in testing. Wilhelm Imaging Research lightfastness ratings are based on accelerated testing of prints on specified media, displayed indoors, under glass. Actual print stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee longevity of prints. For maximum print life, display all prints under glass or UV-absorbing acrylic and protect them from prolonged high-humidity environments. Visit www.wilhelm-research.com for the latest information
4. Ratio determined by weight of 1,600mL ink pack plastic components vs. weight of 700mL cartridge plastic components for UltraChrome Pro inks
